

Problem

I am a team player with a player profile in SportyHQ and I want to enable access to other players so they can contact me via my phone or mobile.

How do I do this?

Solution

There are a number security options:

- Anyone
- Keep it private
- Limit it to...
 - Other people who play in the same league as me
 - Other members at the club I belong to

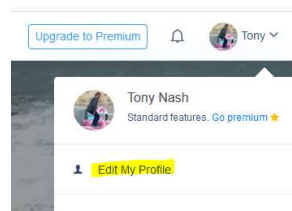

Continue on to complete your preference update...

1. Go to <https://www.sportyhq.com/> and **Login** normally
(*top right hand corner*)

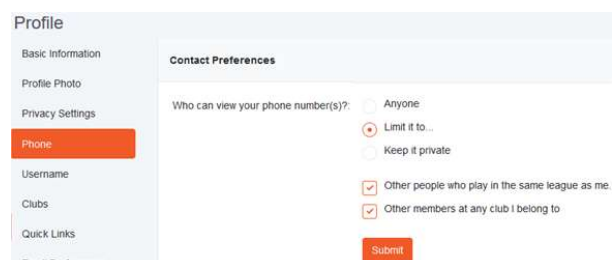

Note: NEVER use 'Create Account'

2. At the '*right top of screen*' select your name then choose '**Edit My Profile**'

Your Profile screen will now appear

3. Set permissions as shown, or how you wish them to be, and then choose **Submit** to register the change.

Note:

You can look around at other settings of interest in this Profile area and update items at will.

We recommend that you also include a postcode and Suburb as well. This helps with identifying and separating players with the same name.
